Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a dry deposit of a non-volatile biologically functional and/or biologically active substance, classified in class 514, subclass 1.
 - II. Claims 7-30, drawn to an apparatus for depositing a sample onto a substrate, classified in class 422, subclass 100.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the product made can be made by another and materially different apparatus i.e. the dry deposit can be made utilizing a manual pipetter to deposit a solution onto the substrate and subsequent drying of the solution. A search for the subject matter of invention of Group I would encompass non-volatile biological compositions and samples and their presence on a substrate in dry form. A search for the subject matter of Group II would encompass the apparatus art including apparatus components and functions e.g. electrosprayer, electrostatic devices, masks and displacement means. As such a search for the subject matter of Groups I and II would not be co-extensive.

3. Because these inventions are distinct for the reasons given above; because the search required for Group I is not required for Group II; and because the groups have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1634

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to BJ Forman whose telephone number is (703) 306-5878. The examiner can normally be reached on 6:30 TO 4:00.
